

# Snap Frames

## Inspect

Before doing anything make sure packaging and frames were not destroyed in shipping. If they were call carrier or supplier right away.

## Handling

Keep frames in plastic and in boxes till you mount on the wall. DO NOT insert poster insert or lens until the frame is mounted on the wall. Also do not unbox or stack frames since you will most surely scratch them, especially if you stack unbagged all in one direction. (the back of one will scratch the front of the one below it).

## Assembly

Install frame on wall with provided screws and make sure it closes and opens, then install

1. steel backer if ordered
2. Insert or poster
3. Lens Cover
4. Close frame and you are done
